

THE NORTH WEST  
**ACADEMY**  
of ENGLISH

### PROJECT OUTLINE

The group will be divided into two groups of 30, each group will have a separate Staff Member taking care of the project. Each group of 30 will be divided into six smaller groups, each group will focus on different aspects connected with environment and ecology: **recycling, fast fashion, water pollution, Green Economy, food waste and biodiversity.**

The students **will need to do a research** on their topics and be able to explain what they are. During their stay they will also work on explaining what the situation is like both in Italy and Ireland. Students **will prepare a survey and will interview people** around Derry city centre to check what they actually know about each issue.

**Each group will need to create their own Instagram account.**

Students will have to create posts with pictures and information about their research; each task will need to be a separate post (or more if necessary). They will also create stories and reels to document their experience, talk about things they will learn and how they spend their time in Derry.

It will be the Instagram account which different students and Instagram users could visit to find out more about the students' findings and the research they will do about the 6 issues.

The Instagram itself will be the final outcome.

The aspects students will focus on:

- the definition of the issue
- the situation in Italy
- the situation in Ireland
- what do people of Derry know about the topic
- final thoughts and recommendations
